

ABSTRACT

This study aims to determine the income analysis of labor farmers in oil palm plantations. The research location is in Bukit Indah Village, Lamandau District, Bulik Regency, Central Kalimantan. The data used in the form of primary data and secondary data. Primary data was obtained from farmers through a list of questions that had been prepared, while secondary data was obtained from PT. The Independent Sustainable Palm Oil. The sampling method used *purposive sampling* by taking a sample of 30 farmers. The results of this study indicate that the income of oil palm farmers at PT. Independent sustainable palm oil is profitable and feasible, because the amount of income is higher than the amount of agricultural expenditure.

Keywords: Income Analysis, Oil palm plantation workers, Types of work of workers

ABSTRACT

Penelitian ini bertujuan untuk mengetahui Analisis Pendapatan Petani Buruh Pada Perkebunan Kelapa Sawit. Lokasi penelitian di Desa Bukit indah, Kecamatan Lamandau, Kabupaten Bulik Kalimantan Tengah. Data yang digunakan berupa data Primer dan data Sekunder. Data primer diperoleh dari petani melalui daftar pertanyaan yang telah disiapkan, sedangkan data sekunder diperoleh dari PT. Sawit Mandiri Lestari tersebut. Cara pengambilan sampel menggunakan *purposive sampling* dengan mengambil sampel sebanyak 30 petani. Hasil penelitian ini menunjukkan bahwa pendapatan petani kelapa sawit di PT. Sawit mandiri lestari mengalami keuntungan dan layak, di karenakan besarnya pendapatan lebih tinggi dibandingkan dengan besarnya pengeluaran petani.
